To make the most effective use of natural stones and satisfy our customers' various needs in enjoying the feelings of being staying with natural surrounds, we have been focusing on the researching, developing, fabricating and exporting new and elegant stone products and their borderline products since the establishment of our enterprise. Our special understanding and passion to all kinds of natural stones and our customers' demands has always been our strength to work with this business.

Since 1980 till now, our products have been supplied to more than 800 hotels and housing projects, and 87 countries and regions over the world. We had been highly appraised by our customers and had gained long-term stable cooperative relationship with customers from Netherlands, Belgium, Australia, Spain, Poland, Kazakhstan, Norway, Japan, USA and Canada, etc for our perfect supplying and services.

Through hard working for more than 36 years, besides our professional capability in the area of granite products, we had not only gained and grasped rich skills in making kinds of indoor and outdoor furniture and building materials, such as cultural stones, mosaic patterns and tiles, decoration borders, etc made of travertine, limestone, marble slate, quartz and sandstones, but also had invested our own travertine and marble quarries as a supply to both our production and the needs from raw material markets.
